SOFTWARE FRONT–END DEVELOPMENT ENGINEER
(WEB AND MOBILE APPLICATIONS)
RIF.: IT-093

DESCRIPTION

Our client is a technology company, part of a Multinational group, that designs and markets solutions and services to unlock the value of data for Telco, Industrial Automation and industrial IoT environment. To support its growth path, We are currently looking for a Front End Software Development Engineer. He/She will be in charge for defining and implementing user experience and user interfaces (UX/UI) that users see and interact within web and mobile applications

QUALIFICATIONS – EXPERIENCE - SKILLS

- Minimum 5 years of experience as front-end developer for web and mobile applications
- Proven experience and knowledge about front-end technologies and integration
- Knowledge of the software development process (SDLC), methodologies, quality and performance metrics: lifecycle, quality assurance and design for testability, continuous integration and continuous deployment technologies, Agile scrum methodology
- Ability to identify and specific requirements for IoT platforms and applications
- Ability to provide best practices for building secure, reliable and consistent user experiences through the use of front-end applications
- Proficiency in front-end programming languages and framework such as HTML5, CSS3, LESS, SASS Angular, JavaScript, Phyton
- Hands-on technical background that enables to easily interact and give guidance to software developers and software architects
- Effective communication skills and proficient in English language

MAIN TASKS & RESPONSIBILITIES

- Work in multidisciplinary team in general, especially with back-end development team responsible for server-side application logic and integration of the work front-end
- Develop storyboards for UX/UI and assure translation to actual code that will produce visual experience and elements of the application
- Ensure the technical feasibility of UI/UX designs
- Build high-quality mock-ups and design different prototypes
- Provide high-quality graphics and visual elements
- Optimize front-end applications for optimal performances and excellent user experience
- Design mobile-based features
